

Bootstrap 5 & GitHub Foundations

Total Duration: 2 Academic Hours (2 × 45 minutes)

Target Audience: Absolute beginners with no prior HTML, CSS, or GitHub experience

Learning Outcomes

- Understand basic web concepts (HTML, CSS, Bootstrap)
- Create a simple responsive webpage using Bootstrap 5
- Understand GitHub purpose and upload a project

Academic Hour 1 – Web Basics & Bootstrap 5

1. Introduction to Web Development (5 min)

Explain what HTML, CSS, and Bootstrap are using simple real-world analogies.

2. What is Bootstrap 5? (10 min)

Bootstrap is a CSS framework that provides ready-made components and responsive layout tools.

3. First HTML File (10 min)

Students create an index.html file and include Bootstrap 5 using CDN.

4. Bootstrap Layout Basics (15 min)

Explain container, row, and column system with live coding.

5. Quick Practice (5 min)

Students modify text and refresh the browser to see changes.

Academic Hour 2 – Bootstrap Components & GitHub Basics

6. Bootstrap Components (15 min)

Introduce buttons and cards with examples and customization.

7. Mini Project (10 min)

Students build a simple page with three Bootstrap cards.

8. Introduction to GitHub (5 min)

Explain GitHub as cloud storage and collaboration tool for code.

9. Create GitHub Account & Repository (10 min)

Students create their first repository on GitHub.

10. Upload Project to GitHub (5 min)

Upload index.html using GitHub web interface.

Assessment & Practice

- Modify Bootstrap text and button colors
- Refresh browser to observe changes
- Re-upload updated file to GitHub

Instructor Notes

Focus on confidence, understanding, and hands-on practice. Memorization is not required at this stage.
